Comments:

### Abstract.

#### Weekly Activity Overview

On this week, I was starting my project and I've done some modules based on the given requirements I've done the session based user authentication using JWT and BCrypt for hashing password and then it navigates to the dashboard and then there are some modules like employee management, project management, task management, time tracking and document management modules and in this week I complete the employee management module with full CRUD operation which register, display, update, and delete the registered employees.

WeekNo:**Week 5** Dates: Monday(20/08/2017) - **Sunday**(26/08/2017) To:**Temesgen Teshome**
