

WEEKLY INTERNSHIP REPORT

Name of student: Tigist Ashenafi

Student ID No.: 1402532

Mentor's name: Endeshaw

Department: Software Engineering

To be filled out by the department:

Submission date: _____

Accepted by mentor: _____

(Date, full name and signature)

Comments:

Abstract.

Weekly Activity Overview

I was initially assigned to Eaglelion Company, but they wanted us to work on remote projects. We agreed to work from home, but they wouldn't supervise us well unless we tried to reach them. So, we decided to apply to different companies that helps us to improve our skills. After a lot of searching eTech Company which is located in ICT Park accepted me.

eTech Company works in various areas of software development, cybersecurity, mobile application and other areas. I joined web development and on the first day I started configuring **AngularJS** for frontend development, **Vert.X**, a java framework for backend development and **PostgreSQL** for storing the data. I finished the configuration, setting up the environment in 2 days and after that I started learning those frameworks using various materials like documentation and various video tutorials.

And on the weekend, I am working on my own learning and trying to do simple projects on my own like to do lists.

✧ Plans for next week

- ◆ Complete the basic understanding of the frameworks to start projects and try to connect with the whole team.

WeekNo:**Week1** Dates:**Wednesday(24/07/2017)-Sunday(28/07/2017)** To:**Temesgen Teshome**

Day	Weekday	Activities
In your Company
